

### **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application. Please cancel claims 4, 5, 13, and 14. Please amend claims 1 and 19 and add new claim 21 as follows:

#### **Listing of Claims**

1. (Currently Amended)      An industrial truck, comprising:  
spaced axles;  
an electrical drive system; and  
~~an energy supply of at least one gaseous medium; and~~  
a mounting device configured to support at least one pressure vessel for the  
storage of the at least one gaseous medium, installed in a mounting device that wherein the  
mounting device and associated pressure vessel can be replaced together ~~with the at least one~~  
~~pressure vessel as a unit, and~~ wherein the mounting device is located in a lower portion of the  
industrial truck between the spaced axles.

2. (Original)    The industrial truck as claimed in claim 1, wherein the at least  
one pressure vessel in the industrial truck is refillable while the pressure vessel and/or the  
mounting device are installed in the industrial truck.

3. (Original)    The industrial truck as claimed in claim 1, wherein the  
mounting device includes additional devices for the generation of electrical energy from the  
gaseous medium.

4. (Canceled)

5. (Canceled)

6. (Original)    The industrial truck as claimed in claim 1, including a fuel cell  
system configured to generate electrical energy from the gaseous medium.

7. (Canceled)

8. (Original) The industrial truck as claimed in claim 1, wherein a main flow of air supply to devices for the generation of electrical energy from the gaseous medium runs at a right angle to a longitudinal axis of the truck.

9. (Original) The industrial truck as claimed in claim 1, wherein control and monitoring devices for operating systems and devices for the generation of electrical energy are permanently installed in the industrial truck.

10. (Original) The industrial truck as claimed in claim 2, wherein the mounting device includes additional devices for the generation of electrical energy from the gaseous medium.

11. (Original) The industrial truck as claimed in claim 2, including a fuel cell system configured to generate electrical energy from the gaseous medium.

12. (Original) The industrial truck as claimed in claim 3, including a fuel cell system configured to generate electrical energy from the gaseous medium.

13. (Canceled)

14. (Canceled)

15. (Canceled)

16. (Canceled)

17. (Original) The industrial truck as claimed in claim 1, wherein the industrial truck is a fork-lift truck.

18. (Original) The industrial truck as claimed in claim 9, wherein the control and monitoring devices are located on a driver's control console.

19. (Currently Amended) An industrial truck, comprising:  
a driver's seat;  
at least two spaced axles; and  
a removable mounting device located between the spaced axles with respect to a longitudinal direction of the truck, wherein the mounting device includes:  
at least one pressure vessel for the storage of at least one gaseous material; and  
a power source connected to the at least one pressure vessel, and  
wherein the mounting device is removably located under the driver's seat.

20. (Previously Presented) The industrial truck as claimed in claim 19, wherein the power source is a fuel cell system.

21. (New) A fork lift truck, comprising:  
a driver's seat;  
spaced axles; and  
a mounting device removably mounted on the truck below the driver's seat and between the spaced axles, the mounting device comprising:  
at least one pressure vessel for the storage of at least one gaseous material; and  
a fuel cell system connected to the pressure vessel,  
wherein the mounting device, pressure vessel, and fuel cell system are removable as a unit from the fork lift truck.
